a step of dividing the document image into a plurality of document areas;
a step of determining an order of the embedding for the plurality of document areas based on a size of the document area or a number of characters included in the document area,

wherein the order of the embedding is determined based on the relationship of relative positions of the document areas in a case where the plurality of document areas have the same size of the document area or the same number of characters included in the document area; and

a step of embedding the digital watermark information over the plurality of document areas in the document image in accordance with the a determined order of the embedding. ”

- b. With regard to **Claim 17** (corresponding to the version filed on Feb. 19, 2008), the claim should now reads as:

“ A computer readable medium ~~program product~~ storing a program for embedding digital watermark information in a document image, the program comprising:
a step of dividing the document image into a plurality of document areas;
